Zur effektvollen Beleuchtung des Trockenmooses empfehlen wir den Einsatz separater Spots.  
For effective illumination of dried moss we recommend the use of separate spotlights.

Da es sich beim verwendeten Moos um ein Naturprodukt handelt, kann es zu Verfärbungen und Ausbleichen kommen. Dies ist insbesondere bei erhöhter UV-Strahlung möglich. Daher sind Verfärbungen und Ausbleichen als Reklamationsgründe ausgeschlossen.

Since the moss is a natural product, discoloration and fading can occur. This is especially possible with increased UV radiation. Therefore, discoloration and fading are excluded as reasons for complaint.

Für ein lang andauerndes Gesamtbild beachten Sie bitte folgende Pflegehinweise:

Moos darf nicht gegossen oder mit Wasser besprüht werden • Zur Säuberung kann ein sanfter Luftstrahl verwendet werden • Bei zusätzlicher Beleuchtung Leuchtmittel ohne UV-Anteil verwenden • Luftfeuchte über 70% vermeiden • Moos vor extremer Hitze und Frost schützen

To preserve the appearance of the moss, please follow subsequent care instructions:

do not pour or spray water on moss • a gentle stream of air can be used for cleaning • use lamps without UV rays for additional lighting • avoid humidity of more than 70% • protect the moss from extreme heat or frost.
